

---

Passionate and efficient Software Developer with a strong background in management and problem-solving. Eager to help optimize and build high quality code in a collaborative environment by applying highly tuned interpersonal skills and detail-oriented knowledge of software design.

---

### Technical Skills

**Languages**[Java, JavaScript, Python, HTML5, CSS] **Frameworks/Libraries**[Express, React, Flask, Node.js, NPM, jQuery, Spring Boot, Spring Tool Suite, Apache, JPA, Tomcat, JVM, JSP, Hibernate, Redux.js, Ajax, Bootstrap, Maven, OOP] **Databases**[MySQL, MongoDB, SQL, NoSql] **Version Control Systems**[Git, GitHub, PowerShell] **Agile Methodologies**[Scrum Master, Sprint, User Stories, Wireframes] **Office Tools**[Microsoft Excel, Microsoft Word, Microsoft PowerPoint]

### Technical Projects

#### General Store

[GitHub](#)

E-commerce application using: *MongoDB, Express, React, Node.js and Bootstrap*

- Leveraged React and Axios to create a responsive RESTful API and MVC architecture for a smooth user experience.
- Utilized Global State through Redux to build a scalable and organized developer-friendly e-commerce platform.
- Implemented secure authentication using JSON Web Token and PayPal API for a personal user experience.

#### Chefit

[GitHub](#)

Pantry inventory management app with recipe search API using: *Python, Flask, Ajax, JQuery, and MySQL*

- Exercised data management and organization by harnessing user-generated input and advanced MySQL queries.
- Increased user experience by leveraging the power of Ajax and JQuery to seamlessly manage dynamic API content.

#### Cork

[GitHub](#)

Classified Ad listing app using: *React, Axios, Java Spring Boot, JavaMailSender, and MySQL*

- Developed in an Agile team to provide a platform to post categorized advertisements using a dynamic single page application framework and the security of Java.
- Applied JavaMailSender to offload sensitive user information into automated HTML emails which reduced the amount of sensitive information stored on the server.
- Integrated Axios and Java Spring to create a clean developer-friendly RESTful API and responsive user environment.

### Professional Experience

General Manager | Bozeman, MT

2019 – 2021

#### *Five on Black*

- Standardized daily restaurant operations by overhauling SOPs, making it easier for employees to find information and operate at a higher more consistent level.
- Boosted sales by over 150% through coaching of positive team culture and applying lean management practices.
- Consistently communicated with owners to improve restaurant metrics and policies to ensure peak operational capacity throughout the COVID-19 pandemic.
- Revitalized a failing restaurant by effectively mentoring and motivating a team of 17 employees.

Reliability Operator | Keene, ND

2013 – 2017

#### *Hess*

- Supervised the implementation of a fully automated production management system that allowed the company to double run sizes.
- Collaborated with engineers to problem solve and overhaul surface and subsurface equipment to improve productivity and decrease operational downtime.
- Mentored new hires and trained a class of 12 on SAMs controller operations for certification.

### Education

- Full-Stack Developer Certificate | Python, MERN, Java | Coding Dojo, Boise 2021 – 2022
  - Immersive 1,200-hour Full Stack Software Developer program specializing in 3 full stacks
- Chef De Cuisine | Yellowstone Club Apprenticeship | Big Sky, MT 2018 – 2019
- Bemidji State University | 32 credits, 3.7 GPA | Bemidji, MN 2010 – 2011
